Creative professional with extensive project experience from concept to development and completion. Skills include Illustration, Graphic Design, Printing, Interior Design, Painting, Streetart, Workshops, Teaching, Arts & Crafts. Talented graphic designer with a strong background in visual arts.

I am always looking for an outlet for my creativity and I found that mixing together very different techniques and mediums can lead to unexpected results. I consider failure as part of the learning experience, with the purpose to better ourselves and our society. Persistence and dedication leads to positive results and growth in my opinion. I am now determined to present to you my work and ideas, for an opportunity to become an active part of this community in the future.
